

Founded by the [old hero Brecca](#), Brecca's Landing is a hub for all things combat and defense. The town is filled with the fighting spirit of Brecca and holds many events in the local colosseum where fighters show their skills.

A small collection of housing units in the back of the colosseum act as government buildings where all governmental business in the city is taken care of. They include the jailhouse, courthouse, barracks, mayor's office and more.

This town is the source of most weapons and armor in the wider region. A surplus of high quality weapons and armor are stored in the barracks at all times.
