

Located in a wizard's tower in the small town of [Freyr](#), this library is owned and ran by [Vargrson](#). Nearly all of the books were written or copied by Vargrson.

### Lower Levels

The lower levels are open to the public and contain many books about the world writ large. These levels include books on topics such as: cooking, local and world history, herbology, basic mathematics and science, bestiaries, religious books, and introductory magic textbooks.

### Middle Levels

These levels are open to a small number of individuals trusted by Vargrson personally, mostly his current and previous pupils. There is a warding spell surrounding the middle levels which prevents anyone from entering if they do not have Karvagr's blessing.

### Upper Levels

These levels are a mystery known only to Vargrson himself.
